

Why STAR-VAC is Your Best Investment !

VALUE

Increases the resale value of your home and it's an excellent selling feature.
It is the last vacuum you will ever need to buy.

HEALTH

Creates a healthier home environment. Removes all allergy causing agents; pollens, dust mites, bacteria from your living area.

CONVENIENCE

Just plug the lightweight crushproof hose in to any strategically located inlet point, for instant suction power. No more lugging heavy canisters up and down the stairs, bumping into furniture and damaging walls.

POWER

Two to Four times more powerful than most outdated lug around vacuum "sweepers". Providing deep down suction power and increases the life of your carpet.

POWER UNIT

All solid tin-plated steel construction. Tough baked on ripple finish powder coating with neutral colours to blend in with any decor. (No caulking used to seal vacuum chamber)

Motor enclosure covered with STAR-VAC's Unique shroud designed for 360 degree radiant motor heat dissipation to extend motor's life.

Motor securely bolted to the body, locked in to a permanent position.

Large dirt receptacle. Needs to be emptied only few times a year.

Wall mounting bracket designed for easy installation or removal. Easy to release clips to hold bucket into position.

Heavy-duty canister gasket provides a lifetime seal.

MOTOR

Latest design, quality motors are used for less power watt consumption but maximum suction power output.

All motors used are permanently sealed double ball bearing, solid cast aluminum body and vacuum impeller, metal chamber for better heat dissipation provides motor longevity.

Solid state circuit board designed with emission filtration and circuit breaker, for reliable and safe operation.

FILTRATION

The dual filtration: Cyclonic and the Unique STAR-VAC Permanent Self-Cleaning Hepa Filter System; NON STICK filter surface designed to reduce maintenance to protect and provide longer motor life, by eliminating dirt build up on the filter.

DESIGNED TO SUIT YOUR NEEDS

Filtration and ventilation can be modified to suit any application to your requirement. Can be fitted with a permanent filter complemented with a replacement bag type filter, to provide extra filtration.

PROUDLY MANUFACTURED IN QUEENSLAND
